

## mANT 30 PA Directional Antenna

High-performance 30 dBi parabolic dish antenna designed for long-range 5 GHz point-to-point links. Features a precision alignment mount for accurate directional aiming, minimizing signal loss. Ideal for WISP backhaul deployments and long-distance wireless bridges in demanding outdoor environments.

### Specifications

Type	Parabolic Dish
Gain	30 dBi
Frequency	4.7 – 5.875 GHz
Polarization	Dual Linear
H Beamwidth	7°
V Beamwidth	7°
Connectors	2x SMA Female
Mounting	Precision Alignment Mount
Material	Aluminium + ABS
Weight	7.3 kg
Wind Survival	150 km/h
Dish Diameter	710 mm
Compatible Devices	All MikroTik 5 GHz radio devices

MTAD-5G-30D3-4STD
