Ubiquiti – Router Móvil LTE Gestionado Ultra Compacto con ...

Managed mobile WiFi router that brings plug-and-play connectivity to any environment. Use the pre-installed AT&T; nano-SIM with three data plan options for LTE data, or bring your own AT&T; nano-SIM. The UMR series is a standalone mobile router, manageable via WiFi, Ethernet, or remotely with an optional Mobility Cloud...

ESPECIFICACIONES TÉCNICAS

CARACTERÍSTICAS DESTACADAS

- LTE category 4 mobile WiFi router
- Pre-installed AT&T; nano-SIM*
- Site-to-site VPN and VPN client routing
- Automatic failover between LTE and wired WAN
- (2) GbE ports with (1) PoE output**
- Powered using PoE, USB Type-C, or 4-pin DC power socket
- Integrated GPS
- Optional Mobility Cloud subscription***
- *Works with the AT&T; network in the United States. LTE data plan options with the pre-installed AT&T; SIM are \$15/month for 1 GB, \$30/month for 5 GB, or \$70/month for 20 GB of data, plus \$15 for each additional GB. Bring your own AT&T; SIM with device version 1.5.0 and later; update out-of-the-box using the pre-installed SIM's free trial or with wired WAN. · **PoE+ input required for PoE passthrough. · ***Mobility Cloud offers secure remote access and full management through the UniFi Mobility Portal for \$2/month per Mobile Router. Mobility Cloud is not required when using your own nano-SIM. Basic management, such as WiFi configuration, is always available with local access through the UniFi mobile app when connected to a Mobile Router's WiFi.
