

# DHI-HY-ARA16

Electronic Siren

### System Overview

Electronic Siren is widely used in security, system failure, transportation, medical rescue, emergency relief, induction detection, and other fields, which is inseparable from social production.

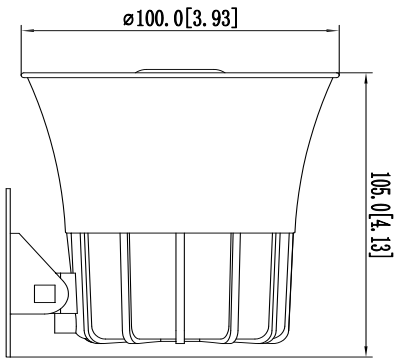

### Scene

It is suitable for places requiring intrusion alarm and perimeter prevention, such as home, stores, urban security, villa walls, community perimeter, factory warehouses, companies, schools, families, warehouses, resources and oil.

### Technical Specification

|                          |                          |
|--------------------------|--------------------------|
| Working Voltage          | DC 9V-15V                |
| Current                  | ≤ 400mA                  |
| Sound Pressure           | ≥ 105±3dB@0.3 m          |
| Continuous Working Hours | ≥ 30 min (DC 24V)        |
| Construction             | ABS                      |
| Color                    | Black                    |
| Bracket                  | 1.5mm black iron bracket |

### Dimensions (mm/inch)
