Flexible Triple-Lens Viewing

Enjoys Versatile Coverage In One Camera

With three lenses working in flexible angles, you can easily adjust how the camera keeps on eye on your space.

Scenario 1

Keep an eye on what's far away

Scenario 2

Watch more of your home at once

Up to 12x Mixed Zoom

Zooms In Up To 12x Smoothly To See Farther

Details that were once too far to see clearly are now within view. From people walking up your driveway to cars approaching your home, important details now stay crystal-clear.

F/2.8mm Wide-Angle View

2x Optical Zoom
For Closer Details

F/6mm Close-Up View

6x Mixed Zoom

12x Lag-Free Mixed Zoom

F/12 mm Ultra-Close View

Ultra-Wide 360° Coverage

Secures Multiple Areas At Once

By pointing the lenses in different directions, the camera reduces blind spots so you don’t have to keep adjusting the camera to check different areas.

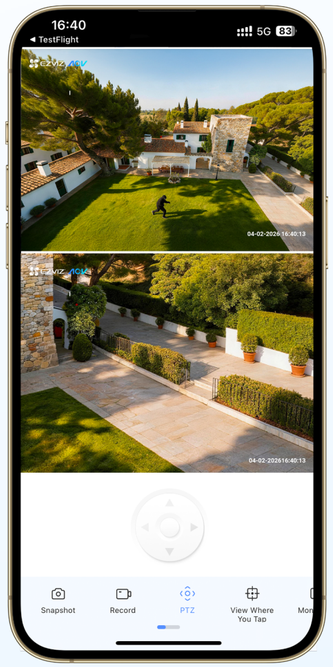

Triple-Lens Co-Detection

Captures The Full Event With Triple Lenses Working Together

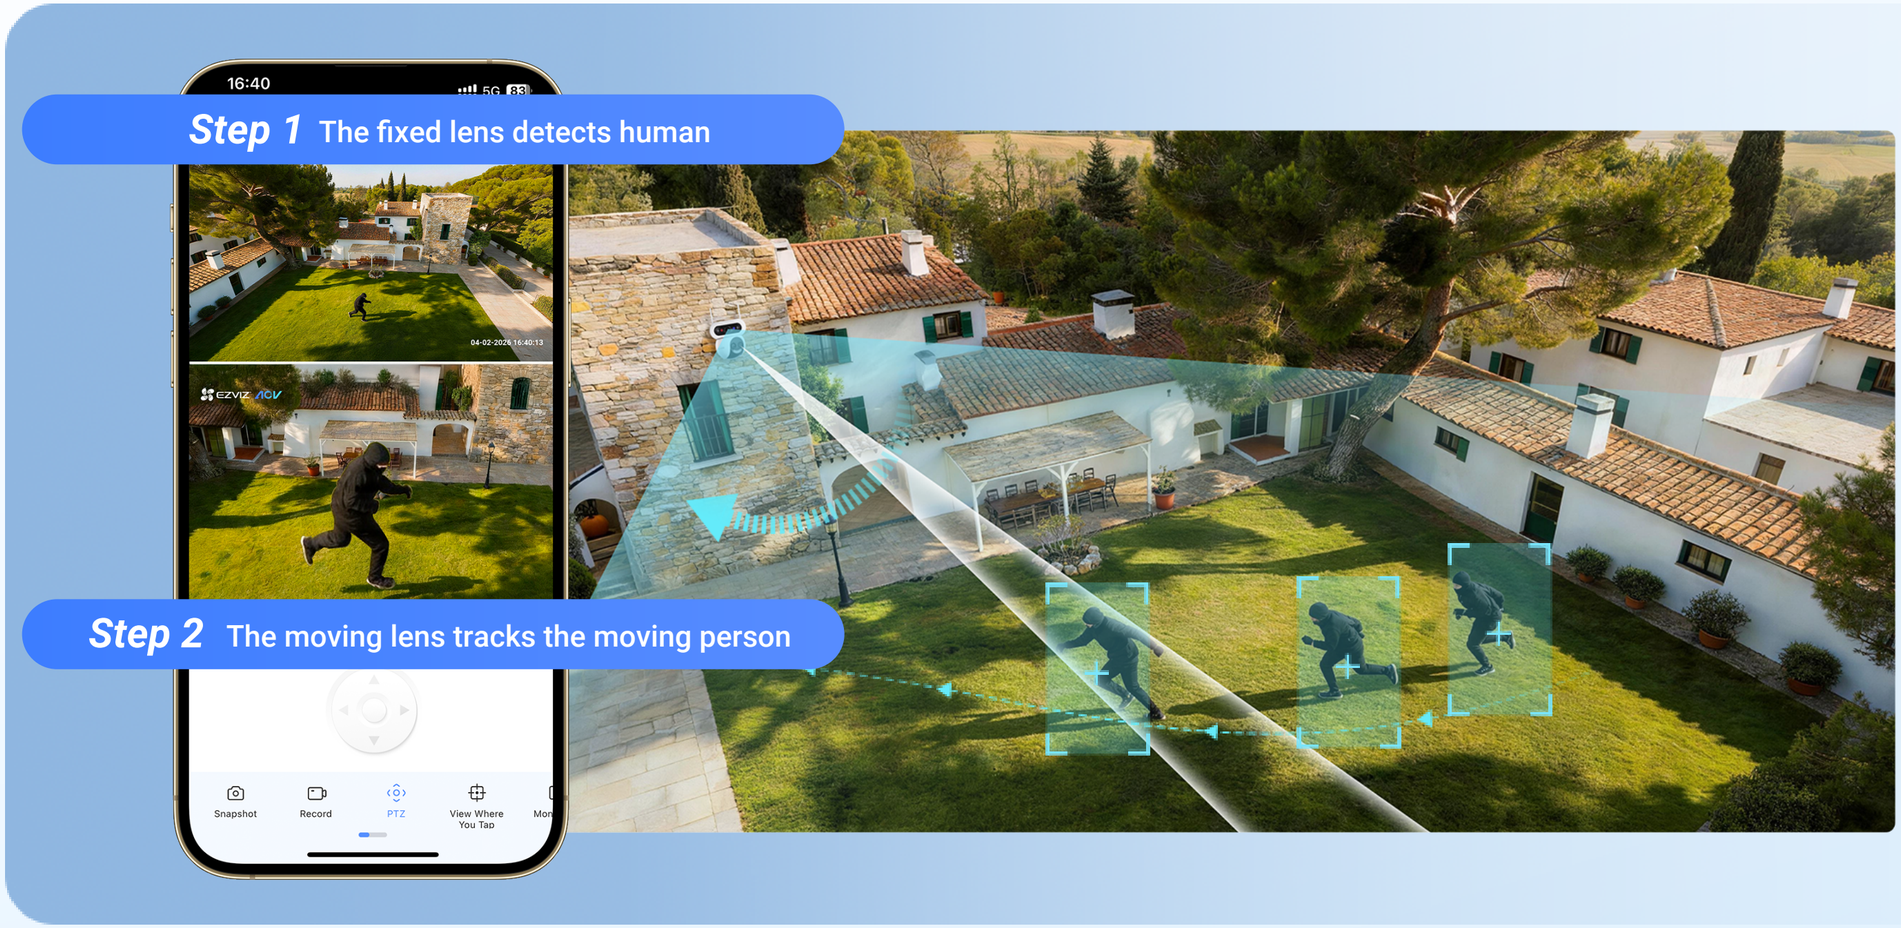

When the upper wide-angle lens detects a person, the lower dual lenses automatically zoom in up to 12x on people at distances up to 50m. With triple-lens co-detection, the camera keeps the person in view and records the event without missing any detail.

Tap-To-Zoom Control

Taps The Bigger Picture And Zooms In To See Details

Simply tap any area in the wide view to instantly zoom in for a closer look.
The camera automatically focuses on the selected spot, allowing you to quickly
check important details without manually adjusting the view.

Always-on Video Mode

Upgrades Your Battery-Powered All-Day Recording

Unlike typical battery cameras that struggle to compromise either recording performance or battery life, this camera features EZVIZ's groundbreaking AOV technology.

Why EZVIZ AOV helps?

Up to 25 meters[3]

Only 9 meters

2-hour sunshine[4] = All-Year & All-Season Protection

Wiser Power Consumption

To adjust recording intervals automatically based on battery power conditions

Local Familiar Face Recognition

Greets The Ones Matter To You Faster With Local AI

With EZVIZ's local familiar face recognition, the camera can quickly recognize familiar faces and let you know when someone you know arrives—so alerts are more meaningful and less distracting[5].

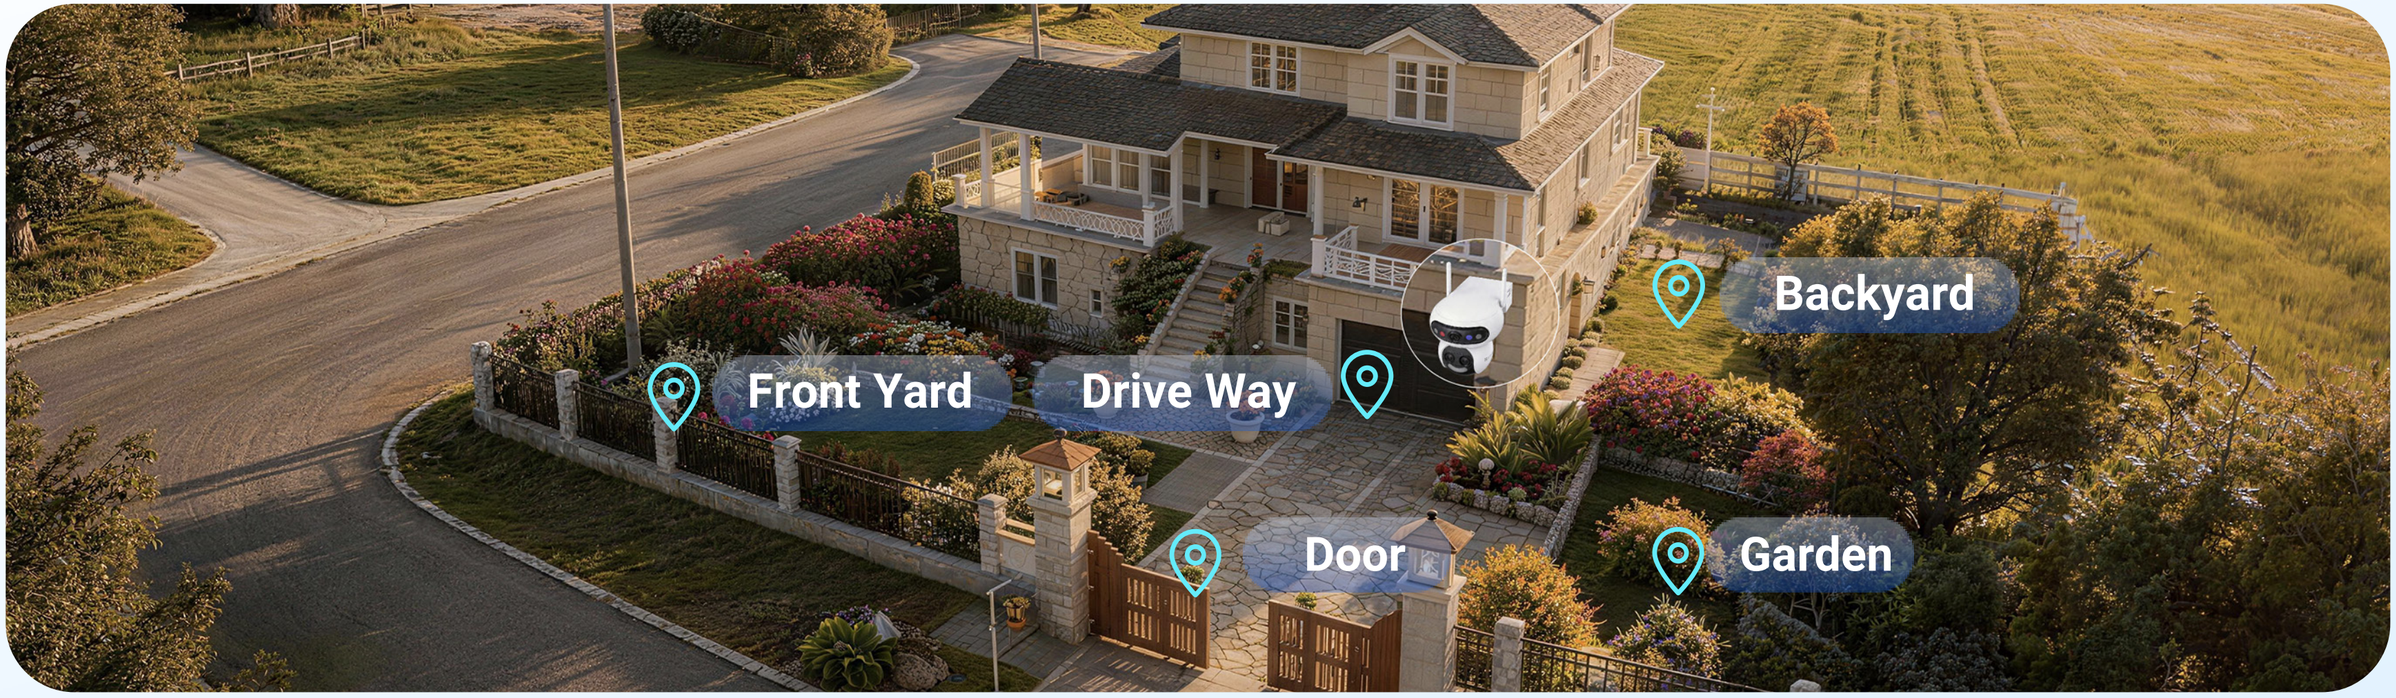

Preset Location & Zoom Ratio

Saves Your Preferred Setting For Quick Views

Normally, checking specific areas requires manually adjusting the camera each time. With preset locations and zoom settings saved in advance, you can instantly return to important views with just one tap.

Saves preferred pan-tilt angles

Saves zooms ratios for each angle

Smart Color Night Vision

Lights Up Your Night With Bright Colors

Say goodbye to blurry, washed-out night footage. Powered by built-in spotlights, brings the night to life with vivid, full-color clarity, even in near-total darkness.

2 Spotlights | Full-Color Night Vision

2 IR Lights | Black & White Night Vision

Balanced Image Exposure

See Every Detail Clearly In Bright And Dark Areas

Advanced exposure balancing helps the camera adjust to complex lighting conditions. Whether it's bright sunlight or shadowed areas, important details remain visible across the entire scene.

Without adaptative smart light

With adaptative smart light

Active Warning with Red-Blue Light & Siren

Adds An Extra Layer Of Protection For Your Home

When suspicious activity is detected, the camera can trigger flashing red-blue lights and a loud siren to draw attention instantly. This active warning helps alert people nearby and makes unwanted visitors think twice.[3]

Easy Installation

Gets Your Camera Running In Minutes

With a simple mounting design and flexible placement options, you can install the camera quickly without complicated setup. It’s an easy way to start protecting your home right away.

1 Use of this feature requires that a compatible local storage card (sold separately) be inserted into the camera.

2 A compatible local storage card must be purchased separately. Cloud storage services are available only in selected markets; availability should be verified prior to purchase.

3 When AOV mode is enabled, EZVIZ Lab testing conducted under standard conditions indicates that the camera can detect motion at distances of up to 25 m in daylight and up to 12 m at night. Under the same test conditions, other battery-powered models using PIR-based detection typically provide a detection distance of up to 9 m. Actual detection performance may vary due to environmental conditions and installation factors.

4 Data from EZVIZ Lab's test results, under the following standard condition: AM=1.5 , 25°C, 1000W/m² and SMQ. The results are obtained based with the camera operating in AOV mode and the AOV interval set to AUTO. Actual charging efficiency may vary depending on sunlight intensity and other environmental conditions. Actual camera operating hours may also differ based on usage patterns, activity frequency, and environmental factors.

5 This feature is currently available only after an OTA update.

6 Based on EZVIZ Lab testing conducted under standard conditions. Video compression efficiency may vary depending on scene complexity, motion frequency, lighting conditions, and other environmental factors.
